Re: Recent PA CD-1 Survey Findings
Date: September 18, 2020

The following outlines the key findings from survey of n=400 likely PA CD-1 voters commissioned by CLF. Interviews were conducted September 14-16, 2020, with 50% of interviews conducted with a cell phone sample of those we can't reach on a landline. The margin of error for the full sample is +/- 4.9% at the 95% confidence level, while the margin of error among sub-groups is greater.

Congressman Fitzpatrick has expanded his lead from July.

- Fitzpatrick led Christina Finello 50%-35% in July and has extended his lead to 52%-36% today.
- Fitzpatrick leads by 13-points among Independent voters, while peeling off 23% from registered Democrats.

Given the expense of the Philly media market and the limited time before the election, it will be difficult for Finello to gain the definition she would need to become competitive.

- Congressman Fitzpatrick's favorable to unfavorable ratio is 58:29, compared to 23:12 for Finello.

Congressman Fitzpatrick is in a strong position headed into the final six weeks of the election and is making it extremely difficult for Democrats to win this seat.
